

SoftControl

Product line 4.1.17

Release notes

Introduction

Purpose

The SoftControl 4.1.17 product line offers a set of program components for deploying the information security system. The system is designed to provide the integrity of the software environment of the network endpoints and to protect data against unauthorized access by maintenance staff or violators.

The following modules are included in the product line.

- SoftControl Service Center that consists of:
 - SoftControl Server, the server component;
 - SoftControl Admin Console, the management console.
- SoftControl ATM Client / Endpoint Client / SClient / SysWatch, the client components for proactive protection of self-service devices, corporate network workstations, servers, and personal computers, respectively;
- SoftControl DLP Client, the client component designed to monitor and collect data about the user's activity.

This document presents the main changes and new features included in versions 4.1.17.

SoftControl Service Center

SoftControl Admin Console

Improvements and new features:

1. Displaying events on the 'Log' tab with a large number of events in the database is improved. Before the console receives the reply from the server, it displays the following message: 'The processing of this request can take some time because of large amount of the recorded events'.
2. The configuration of tabs (the columns and their order) is stored after the user exits the program.
3. The console displays the number of connected client applications for each of the organization units.
4. 'Client type' column is added to the filters on the 'Log' tab. Possible values in the column are SysWatch, DLP, and empty field (for common events).
5. Improved operation of registry rules.

Bug fixes:

1. Problems sometimes occurred when automatically updating antivirus bases and software modules.
2. Improved calculation of the expiration time for SoftControl SysWatch one-time passwords ('Time left' parameter).

Fix:

Fixed in version 4.1.17.

SoftControl Server

Bug fixes:

Improved transfer of rules from the server to client applications.

Fix:

Implemented in version 4.1.17.

SoftControl SysWatch

Improvements and new features:

Self-protection of the client application is improved.

Bug fixes:

1. After applying the configuration file, the corresponding settings were not displayed in the 'Control policy' window.
2. Collisions sometimes occurred when starting Windows, if there were a large number of startup scripts and programs on the ATM.
3. When uninstalling a client component, system profile was not removed.

Fix:

Fixed in version 4.1.17.

SoftControl DLP Client

Bug fixes:

When monitoring the activity of the applications, no information was logged on 64-bit operating systems (Windows 7 and higher).

Fix:

Fixed in version 4.1.17.
