

SoftControl

Product line 5.0.18

Release notes

Introduction

Purpose

The 5.0.18 product line by Safe'N'Sec Corporation offers a set of program components for deploying the information security system. The system is designed to provide the integrity of the software environment of the network endpoints and to protect data against unauthorized access by maintenance staff or violators.

The following modules are included in the product line.

- SoftControl Service Center that consists of:
 - SoftControl Server, the server component;
 - SoftControl Admin Console, the management console.
- SoftControl ATM Client / Endpoint Client / SClient / SysWatch, the client components for proactive protection of self-service devices, corporate network workstations, servers, and personal computers, respectively;
- SoftControl DLP Client, the client component designed to monitor and collect data about the user's activity;
- SoftControl DeCrypt, the client component designed to encrypt the hard disks of self-service devices, corporate network workstations and servers.

This document presents the main changes and new features included in version 5.0.18.

Release notes

Improvements and new features

New feature	SoftControl Admin sole	SoftControl Con-Server	SoftControl SysWatch	SoftControl DLP Client	SoftControl DeCrypt
A space character at the end of an existing rule is displayed as a dot. It helps to avoid errors caused by an accidentally typed space at the end of a string.	v		v		
Activity control rules can be set for groups of users.	v	v	v		
Built-in security principals (e.g., Local Service, Network Service) can be selected in advanced settings for activity control rules.	v	v	v
